01 PROFILE

With over seven years of expertise in the IT consulting sector, I am a seasoned Android Developer and Flutter enthusiast, boasting robust programming and problem-solving skills. My passion lies in the application of SOLID principles, streamlining the development process, and enhancing code maintainability while minimizing unnecessary complexities. Whether it's crafting an Android app from the ground up or refining the architecture for enhanced sustainability, my capabilities ensure the delivery of top-tier, maintainable solutions.

02 EMPLOYMENT HISTORY

Nov 2016 — Mar 2021

Jakarta Selatan

Android Developer at PT. Buana Varia Komputama

- Expertly designed and developed advanced applications for the Android platform, ensuring cutting-edge user experiences.
- Collaborated with cross-functional teams to define, design, and launch innovative features, meeting project goals and user needs.
- Integrated external data sources and APIs to enhance app functionality and user engagement.
- Conducted thorough unit testing to ensure code robustness, usability, and reliability, even in edge cases.
- Dedicated to bug fixing and optimizing application performance for a seamless user experience.
- Proactively researched and integrated new technologies to boost development efficiency and maintain high code quality and organization.
- Spearheaded the Android development process, effectively managing code from development to production environments.
- Implemented code maintenance and improvement strategies to minimize boilerplate code and streamline processes.
