Enthusiastic in implementing SOLID principles which can make the process of developing and maintaining code more efficient and reduces boilerplate codes. Have capability either develops android app from scratch or re-design architecture to be more maintainable and scalable.

SUMMARY OF PRODUCT
Buana varia komputama
Work Experience   : November 2016 - Maret 2021

- Design and build advanced applications for the Android platform
- Collaborate with cross-functional teams to define, design, and ship new features
- Work with outside data sources and APIs
- Unit-test code for robustness, including edge cases, usability, and general reliability Work on bug fixing and improving application performance
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency help maintain code quality, organization, and automatization
- Work as single android developer.
- Deploy Development, Staging, and Production Environment
- Continuously maintains and improves code to reduces boilerplate codes

Project Coverage:
Client   : Rumah Sakit Support SIMRS MIRSA
Project name   : Application Android hospital reservation
Position in Project   : Developer
Responsibility   : Development Android Application
Technology   : Sybase, .Net, Php, Java Android, Firebase
Link Playstore   :
https://play.google.com/store/apps/developer?id=Platform+Indonesia+Sehat

Project Coverage:
Client   : RS Pertamedika IHC
Project name   : Application Android hospital reservation
Position in Project   : Developer
Responsibility   : Development Android Application
Technology   : Android Java, MVC, Firebase
Tools   : Android Studio, Git, Bitbucket, Source Tree, Postman
Link Playstore   : https://play.google.com/store/apps/details?id=com.reservperta

Project Coverage:
Client   : Dinas Kab.Bogor
Project name   : Reservasi Puskesmas Kab.Bogor
Position in Project   : Developer Android
Responsibility   : Development Android Application
Technology   : Java Android, MVC, Retrofit, Firebase
Database   : postgresql, Sqlite
Period   : 7 September 2020 - 3 Oktober 2020

Tools   : Android Studio, Git, Bitbucket, Source Tree, Postman

Mitra Transaksi Indonesia (Yokke!) outsourcing Binar Academy
Work Experience   : April 2021 - Present

Designing and creating applications using the Futter platform and collaborating with the UI UX team and the backend developer team, making innovations by making products that clients like. Bug fixes and improve application performance and implement new technologies to maximize development, and maintain code quality.

Project Coverage:
Client   : Product Yokke!
Project name   : Yokke Loyalty App
Position in Project : Flutter Developer
Responsibility   : Development Mobile Application
Technology   : Dart, flutter, Flutter MVVM, provider
Database   : Postgresql

- Daily Works :
- Work as single android developer.
- Business Process Application
- Fitur improves
- Continuously maintains and improves code to reduces boilerplate codes
- Bug Resolution.
- Implement New/Change Request.
- State Management Provider
- API Integration
- Write code in DART flutter framework
- API testing
- Testing

- Build and Compile

Project Coverage:
Client   : Product Yokke!
Project name   : Yokke Biz Lite (Point Of Sale)
Position in Project : Flutter Developer
Responsibility   : Development Mobile Application
Technology   : Dart, flutter, MVC, Dio, State Management GetX, OTP, OneSignal
Notification
Database   : Oracle

- Daily Works :
    - Work as flutter developer team.
    - Continuously maintains and improves code to reduces boilerplate codes
    - Bug Resolution.
    - improve performance
    - Write code in DART flutter framework
    - Implement New/Change Request.
    - Implement GetX State Management
    - Implement Dio package
    - Redesign product
    - Flutter MVVM
    - API Integration
    - Payment Transfer bank integration
    - Qris payment integration
    - Developing follow design figma UI UX
    - Testing release firebase distribution and appstore testflight
    - Build and Compile

Project Coverage:
Client   : BANK OCBC
Project name   : Nyala Bisnis Merchant (OCBC QRIS)
Position in Project : Flutter Developer
Responsibility   : Development Mobile Application
Technology   : Dart, flutter, MVVM, Dio, State Management GetX, Firebase, OneSignal,
OTP
Database   : Oracle

- Daily Works :
    - Work as flutter developer team.
    - Continuously maintains and improves code to reduces boilerplate codes
    - Bug Resolution.
    - improve performance
    - Write code in DART flutter framework
    - Implement New/Change Request.

- Implement GetX State Management
- Implement Dio package
- Implement OneSignal Notification
- Redesign product
- Flutter MVC
- API Integration
- Integration MAAS system
- Qris payment integration PTEN
- Developing follow design figma UI UX
- Testing SIT UAT
- Testing release firebase distribution and appstore testflight
- Build and Compile

Bootcamp Product Management Binar Academy
Experience   : November 2022 - Maret 2023

- Daily Works :
  - Research, analyze, define product features
  - Creating User persona, Customer Journey mapping
  - Determine the OKR matric hypothesis
  - Create a product MVP
  - Creating Product Required Document (PRD), wireframes and workflows.
  - Collaborate with Team UIUX
  - Final project revamp app flash coffe

Jutive.com (Freelance)
Work Experience   : November 2023 - Present

Create an attendance application using Flutter with state management GetX and has a login feature using face ID, attendance using location access, and detecting faces. This application also has salary payslips and reimbursement features

Project Coverage :
Client   : Jutive.com
Project name   : EZYHR Mobile Apps (Attendance application)
Position in Project   : Flutter Developer
Responsibility   : Development Mobile Application
Technology   : Dart, flutter, MVC, Dio, State Management GetX, OTP, Face ID, Location

- Daily Works :
  - Work as flutter developer team.
  - Bug Resolution.

- improve performance
- Write code in DART flutter framework
- Implement New/Change Request.
- Implement GetX State Management
- Implement Dio package
- Flutter MVC
- API Integration
- Developing follow design figma UI UX
- Implementation FaceID login
- Location detection
- Face Detection
- OTP send by email
- Testing UAT
- Testing release firebase distribution and appstore testflight
- Build and Compile
